

# Guardian

## Electronic Room Safe

The Guardian culminates 10 years of product excellence. This electronic room laptop safe is high on quality yet competitive on price.

All Guardian safes come with a 2 year warranty and you can expect decades of reliability. Four AA batteries give years of life even under heavy use.

### Operation

Guest follow the clear and simple instructions on the front of the safe.

To lock the safe

1. Press Reset
2. Enter a 4 digit PIN
3. Press Lock

To unlock the safe

1. Enter your 4 digit PIN

Hotel managers use a service unit and 6 digit service code to open safes when guests forget their PIN. In case of emergency the safes can be opened with a copy proof manual key.

Optional extra power-sockets inside the safes allow guests to charge their laptops and other electronic equipment stored in the safe.

### Security

The solid steel construction and double bolt locking deters the most persistent thieves. Tamper proof lock out occurs when a set number of wrong PIN codes are entered.

Audit trail versions store up to 120 transactions that download to pdas or printers.

### Style

Quality finishes and high precision engineering lift the elegance of any hotel room. The Guardian comes in a range of colours - from the black door with black or grey body, to a cream body and cream door.

The standard size Guardian easily fits most modern laptops (height 200mm, width 450mm, Depth 400mm). The width can be varied between 500mm and 380mm and the depth from 400mm down to 300mm. A new top opening model allows the safes to be fitted vertically giving another option when room space is limited.

## Technical Data

- Overview
  - Digital laptop in-room hotel safe with electronic lock and unlock
  - Electronic keypad and locking
  - Bright clear LED display
